## SUMMARY

MCA student specializing in Cloud Computing at Parul University, with hands-on backend development experience shipping a full-stack quiz web portal during a 2-month internship at Enlighten Infosystems. Built using Python Flask, MySQL, and core JavaScript — handling routing, database integration, and user session logic independently. Solid grasp of Core Java, OOP principles, and client-server architecture. Currently developing proficiency in Spring Boot REST APIs and DSA. Looking to contribute as a Junior Java Developer where engineering quality and ownership matter.

## EDUCATION

|                                                                                                                                                                    |                                                 |

## TECHNICAL SKILLS

**Languages:** Core Java, Python, SQL, HTML, CSS, JavaScript  
**Frameworks:** Python Flask, Spring Boot (*in progress*)  
**Databases:** MySQL – schema design, joins, CRUD operations  
**Concepts:** OOP, Data Structures & Algorithms, REST Architecture, MVC Pattern, Client-Server Model  
**Tools:** Git, IntelliJ IDEA, VS Code  
**Currently Learning:** Spring Boot, Spring Data JPA, JWT Authentication, Advanced DSA
